Profile

Information Security professional with hands-on experience in cybersecurity platform deployment, security validation, risk assessment, access control, and Linux-based security environments. Skilled in Python, SQL, data analysis, REST APIs, and relational databases, with experience developing secure applications and analyzing security-related data. Familiar with AWS cloud fundamentals and data-driven security solutions, with working knowledge of OWASP Top 10, VAPT, vulnerability assessment, authentication, authorization, and API security. Interested in Cyber Risk, Data Analytics, Technology Risk, and data-driven security solutions.

Education

Bachelor of Technology | ***BTech:Electronics and Communication*** July 2019 – June 2023
Universal Engineering College APJ Abdul Kalam Technological University

Work Experience

Project Associate– Information Security June 2025 – Present
National Institute of Electronics and Information Technology– NIELIT Calicut, kerala

- Led deployment and integration of cybersecurity and digital forensics platforms under Government of India initiatives, configuring Linux-based security environments, implementing access controls, and validating security readiness and operational integrity.
- Performed cybersecurity requirement analysis, risk identification, security validation, and technical security assessments to identify security issues and support mitigation and remediation activities.
- Validated access-control mechanisms and security configurations across deployed environments and maintained technical evidence and documentation for security validation and operational procedures.
- Collaborated with technical teams, government stakeholders, and vendors to investigate security-related issues, validate solutions, and translate security requirements into actionable implementation activities.

Software Developer Technical Trainee June 2024 – June 2025
Kerala Startup Mission– SuperFablab Kerala Kochi, Kerala

- Developed secure web applications using Python, Django, Django REST Framework, React.js, and SQL, implementing role-based access control, authentication, authorization, and secure REST APIs.
- Worked with relational databases and application data to develop backend functionality, APIs, and analytics-oriented features while supporting data integrity and secure data handling.
- Contributed to end-to-end project delivery through requirement gathering, sprint planning, task estimation, feature prioritization, testing, and release coordination with cross-functional teams.

Python–Django Full Stack Development Intern July 2023 – December 2023
GALTech Technologies Pvt Ltd Thrissur, Kerala

- Developed and maintained full-stack web applications with a focus on responsive design and user experience, implementing CRUD APIs, optimizing database queries, and enhancing front-end functionality using React.
- Strengthened application security through server-side input validation, token-based authentication, and endpoint access controls, reducing exposure to injection and broken authentication vulnerabilities while gaining hands-on experience across the SDLC, from requirements and development through testing and deployment.

PROJECTS

DORA – Digital Office Reception Assistant

- Led the development of an AI-powered digital receptionist integrating GSM, sensors, and voice-enabled automation to support secure and automated visitor management.

FabStash – Inventory Management System

- Developed a full-stack inventory management system with JWT authentication, role-based access control, and an analytics dashboard for request and stock tracking.

Securing LLM-Driven Onboarding Systems Against Adversarial Prompt Attacks

- Designed a multi-layer security architecture for an LLM-driven employee onboarding and IT helpdesk agent to detect and mitigate prompt injection, privilege escalation, and attempts to exfiltrate internal information.

Razorpay Application Submission Portal

- Developed a secure application submission portal with Razorpay payment integration, resume upload functionality, and an administrative dashboard for managing applicant submissions.

SVG Image Editing Application

- Developed a browser-based SVG editor supporting scaling, rotation, download, undo/redo, and real-time UI controls for interactive image editing.

E-commerce Shopping Cart Application

- Developed a responsive e-commerce cart with real-time updates, dynamic free-gift functionality based on purchase thresholds, and an interactive checkout progress tracker.

PUBLICATIONS

DORA:Digital Office Reception Assistant May-June 2023

International Journal of Scientific Research in Engineering & Technology (IJSREAT), Vol. 3, Issue 3, pp. 01–05

HONORS AND AWARDS

First Prize – Aavishkar Technical Paper Presentation 2022

DORA: Digital Office Reception Assistant

SKILLS

Data & Programming: Python, SQL, Data Analysis, Machine Learning Fundamentals, Java, JavaScript

Databases & Data Management: MySQL, PostgreSQL, Relational Databases, SQL Querying, Data Validation, Data Integrity

Data & Application Development: Django, Django REST Framework, React.js, REST APIs, Analytics Dashboards, API Development

Cloud: AWS Cloud Fundamentals (EC2, S3, IAM, VPC, CloudWatch)

Cyber Risk & Security: Risk Assessment, Vulnerability Assessment, Vulnerability Management, OWASP Top 10, API Security, Authentication, Authorization, RBAC, Secure SDLC

Security Testing: VAPT, Manual Security Testing, Vulnerability Validation, Remediation Validation, Burp Suite, OWASP ZAP, Nmap, Nessus, SQLmap, Kali Linux, Postman

Platforms & Practices: Linux, Windows, Git, GitHub, Agile, Requirement Analysis, Testing, Deployment, Technical Documentation
